

Proposed Science Resources for Elementary Schools

A teacher selection committee has recommended the adoption of STEMscopes as the new primary Science resource for GBSD elementary classrooms. STEMscopes is a phenomena-based digital curriculum that is brought to life through hands-on experiences and student-driven inquiry.

With school board and budget approval this spring, STEMscopes will be rolled out in two phases. Grades 3-5 will begin implementation in during the 2019-2020 school year and grades K-2 will implement the following year. STEMscopes was recently adopted as the primary Science resource for grades 6-8 in GBSD classrooms as well.
